20% longer lasting

Braking on wet roads

Key benefits

Michelin always aims to bring together multiple performances.

At MICHELIN, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™, which has and will always be our difference on every tyre.

Rubber that sticks to the road

An all new silica-enriched rubber compound enables MICHELIN Pilot Road 4 tyres to provide exceptional grip no matter what the angle, from - 5°C on dry roads and 2°C on wet roads, up to 45°C on almost any kind of road.

20% longer lasting¹

With harder rubber at the centre thanks to 2CT technology, a new tread pattern and brand new tread compounds MICHELIN Pilot Road 4 tyres are 20% longer lasting¹ than MICHELIN Pilot Road 3 tyres. Their MICHELIN XST+ sipes have chamfered edges to limit irregular wearing.

Noticeably improved braking times²

MICHELIN Pilot Road 4 Trail tyres are able to stop 17% shorter² than their nearest competitor on wet roads and up to 24% shorter on very slippery wet surfaces such as white lines and pedestrian crossings.
